

Don't Assume I'm Healthy!

Take steps to protect
yourself and your patients
from pathogens

Keep food and
drinks out of
animal and lab
areas

Change your
clothes and
shoes before
leaving work

Properly
clean and
disinfect areas
after patient
contact

Wear appropriate
personal protective
equipment

Wash your hands after
patient contact

While this dog may
not look like he's a
carrier of anything
contagious, he
could be. You just
can't trust a pretty
face...
